

SIXTEEN WORKSHOPS

Providing Advanced Maintenance Services

At SMS group, we are an original equipment supplier offering comprehensive maintenance and spare part services for metals production, continuous casting and rolling (flat and long products), tubes, welded pipes, forging, non-ferrous technology, and heat treatment plants - all from a single source. Apart from traditional refurbishment services for all major OEM equipment, you can also take advantage of our comprehensive field services and modernization projects. Steel production is our largest market, where we supply world class new equipment and actively support operations and maintenance devising solutions throughout the process from melting and casting to rolling and finishing. In addition to new equipment supply, our Forging division has experienced maintenance specialists who focus on closed and open die forging, powder metal presses, extrusion presses, and ring rolling. New equipment supply, maintenance services, and spare parts inside the aluminum industry crosses a wide variety of products including flat rolling mill equipment, plate stretchers and extrusion presses. For tubes and pipes, our unique broad know-how covers the complete line of processes from ERW to spiral welded pipe as well as seamless producing operations utilizing equipment from cold drawing and pilger mills to piercing mills. It is our commitment to be the Leading Partner for our customers guiding and assisting our customers to make equipment and process decisions that allow them to remain competitive in an ever evolving global market, and serve as a single source for new equipment, maintenance and spare parts that our customers can trust and value.
